PROFESSIONAL SUMMARY

Computer Science graduate (UEM Kolkata, 2026) with internship experience in data validation, AI/ML systems, and cloud deployment. IBM-certified in AI, Data Fundamentals, and Web Development (SkillsBuild); self-studied KYC/AML basics and Cybersecurity Fundamentals (Coursera). Brings strong process-compliance mindset, attention to accuracy, and ability to manage structured workflows end to end.

WORK EXPERIENCE

AIML Intern | IBM SkillsBuild · Remote

Jun 2024 – Jul 2024

- Deployed full-stack website on IBM Cloud (IBM Watsonx chatbot, REST API-driven), cutting manual response time ~40% — delivering within a structured, target-driven environment requiring strict process compliance and quality assurance.
- Built Disease Detection system (Python, Scikit-learn) on 1,000+ medical records achieving 92% accuracy; applied systematic data-quality checks, documented all findings, and escalated edge cases to senior reviewers — demonstrating the documentation discipline and judgment required in verification-heavy roles.

Intern — Software & Simulation | IEDC Labs Innovation Cell, UEM Kolkata

May 2025 – Jun 2025

- Engineered MATLAB object-detection algorithms and calibrated sensor data pipelines, reducing false positives ~30% — requiring rigorous data validation, anomaly reporting, and performance monitoring against defined quality targets throughout.

PROJECTS

Organ Donation System — Blockchain | Java · SHA-256 · Maven · MVC

Mar 2024 – May 2024

- Implemented SHA-256 cryptographic hashing and hash-chain validation to ensure 100% data immutability; chain-validation logic automatically detects any unauthorised modification to stored records — applying the same data integrity and audit-trail principles central to regulated record-keeping environments.
- Designed systematic cross-checking at every data entry point and structured escalation when inconsistencies arise — workflows requiring strict process compliance, data verification, documentation review, and quality assurance standards similar to those used in KYC operations.

MediTrack — Medicine Reminder PWA | HTML · CSS · JS · Firebase · REST APIs

2025

- Built and deployed full PWA (Service Workers, Push Notifications, Geolocation API, dual auth: localStorage + Firebase Google OAuth 2.0) on Netlify with continuous deployment; demonstrates end-to-end ownership from requirements to live production. Live: meditrack-reminder-app.netlify.app

CNN from Scratch | Java · Linear Algebra · OOP

Sep – Nov 2025

- Architected full CNN in Java (Convolution, Max Pooling, Backpropagation, custom Matrix Utility) without ML libraries — functional handwritten-digit classifier reinforcing methodical, first-principles problem solving and systematic debugging.

EDUCATION

B.Tech in Computer Science Technology | University of Engineering and Management, Kolkata

June 2026

TECHNICAL SKILLS

Languages | Java, Python, JavaScript (ES6+), HTML5, CSS3, SQL

Front-End | React.js, PWA, Service Workers, Firebase, AJAX, REST APIs, Responsive Web Design

Back-End & DB | Node.js, Express.js, MongoDB/NoSQL, MVC/MV* Patterns

Tools & Cloud | Git, GitHub, AWS, IBM Cloud, Netlify, VS Code, SonarQube, IBM Watsonx Assistant

ML & Methods | Pandas, NumPy, Scikit-learn, Agile/Scrum, TDD, OOP, Design Thinking

Certifications | Coursera (Cybersecurity Fundamentals) · IBM SkillsBuild (AI Fundamentals, Data Fundamentals, Web Development) · LinkedIn Learning (Agile, OOP) · NPTEL (Soft Skills)

ACHIEVEMENTS

Academic Excellence Rank Card Certificate | 3rd Prize – Debate Competition (Dept.) | 3rd Prize – Essay Writing Competition (Dept.)
